

Maureen Gannon | Igniting American Innovation

Co-Founder and Chief Growth Officer, X-Bow Systems Inc.

Maureen Gannon embodies the spirit of American entrepreneurship and innovation in the aerospace and defense sector. As Co-Founder and Chief Growth Officer of X-Bow Systems Inc., she's charting new frontiers and advanced technologies for propulsion systems and space technology.

Key Highlights:

- 30+ years of expertise in aerospace and consumer products industries
- Raised over \$150 million in start-up capital for X-Bow Systems
- Achieved remarkable year-on-year revenue growth of over 320%
- Secured significant contracts, including an initial \$60 million Air Force AFWERX STRATFI award to multi-million dollar production contracts
- Patent holder for groundbreaking advanced manufacturing technologies

Ms. Gannon's entrepreneurial journey is a testament to American ingenuity. Her innovations are expanding the possibilities of aerospace engineering, contributing to America's leadership and defense. Under her guidance, X-Bow Systems has become a hub of cutting-edge research and development, propelling the next wave of space exploration and technological breakthroughs.

Her strategic vision has established X-Bow Systems as a key innovator in the Solid Rocket Motor industry. Ms. Gannon's work is opening new horizons in the production of propulsion technology, with applications ranging from scientific research to commercial space ventures.

A global thinker and polyglot, Ms. Gannon brings an international perspective to American innovation. Her entrepreneurial spirit extends beyond X-Bow, having co-founded Galactic Unite (a Foundation of Virgin Galactic) and Firefly Space, further accelerating the commercialization of space and fostering a new era of cosmic entrepreneurship.

With a master's in international business and a proven track record of building high-performing teams, Maureen represents the best of American entrepreneurship and leadership. Her work is not only advancing our aerospace and defense capabilities but also inspiring the next generation of innovators and strengthening America's position in the global innovation economy.

X-Bow Systems is disrupting the aerospace industry with innovative and cost-effective advanced manufactured energetics for the solid rocket motor and launch vehicle market. X-Bow is also designing and building a suite of modular solid rocket motors and small launch vehicles for both orbital and suborbital launch services. X-Bow is led by CEO Jason Hundley, Chairman Mark Kaufman, CTO Max Vozoff, CRO Maureen Gannon, General Counsel John Leary, COO Mike Bender and a growing team of seasoned industry veterans and new space entrepreneurs. X-Bow is a dual-use technology company with investment from Crosslink Capital, Razor's Edge Ventures, Balerion Space Ventures, Boeing, and Lockheed Martin Ventures. Headquartered in Albuquerque, New Mexico, X-Bow has additional presence in California, Alabama, Colorado, Texas, Utah, Maryland and Washington, DC. For more information visit www.xbowsystems.com.
